

# SLEEPERPLAN / WORKSHOP PACK

DRAFT\_MARK\_OUT\_ONLY

## First rectangular bed draft - 2400 x 1400

As of 2026-09-06 | Generator 0.3.0 | Plan 2cc9734e651e0877

Worked example unless your own surveyed job file has been used. A reviewed status records human checks; it is not structural certification.

| BED          | OUTSIDE L x W x H (mm) | COURSES | CLEAR OPENING (mm) | FILL (litres) |
|--------------|------------------------|---------|--------------------|---------------|
| first-bed-01 | 2400 x 1400 x 600      | 3       | 2200 x 1200        | 1452.0        |

### 12 labelled pieces | 56 fixing entries | 12 purchased sleepers | 6 saw cuts

Timber + screw purchases: GBP 354.60

Known subtotal: GBP 354.60. NOT a completed job cost. Unpriced items remain.

Cutting: exact. All explored cutting patterns and inventory states solved.

Use BUILD.md for the assembly sequence. Use cuts.csv for saw bands and fixings.csv for full coordinates. Treat all pilot entries marked UNCONFIRMED as mark-out only, not a drilling instruction.

# REVIEW GATES & ASSUMPTIONS

| TYPE    | CHECK                                                                                                                                                                                                                                                                                                                                           |
|---------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| BLOCKER | Measure actual stock length/section, usable ends and saw kerf; update inputs before cutting.                                                                                                                                                                                                                                                    |
| BLOCKER | Review foundations, drainage, soil loads, support/bracing and any buried services on site.                                                                                                                                                                                                                                                      |
| BLOCKER | Review screw suitability, end-grain connections, penetration and spacing with a competent builder / supplier.                                                                                                                                                                                                                                   |
| BLOCKER | Record reviewer, reviewed_on and review notes before releasing a workshop pack.                                                                                                                                                                                                                                                                 |
| BLOCKER | Release readiness requires review.approved_physical_design_hash to equal the current physical design hash, so an edited job cannot inherit an old review. Run a draft plan, then copy the printed physical design hash into the job's review block after a genuine physical review.                                                             |
| NOTE    | Screw heads, bearing seats, recesses and driver access are NOT modelled. On stacked courses a protruding head can stop the next course sitting flat even though all shafts pass the collision check, and recessing a seat deepens the hole and moves the tip. Confirm the head-seat detail with the actual hardware before stacking any course. |
| BLOCKER | wickes-287686: fixing centres are mark-out only. Confirm pilot diameter/depth or a manufacturer-supported no-pilot instruction; none is inferred.                                                                                                                                                                                               |
| BLOCKER | wickes-287688: fixing centres are mark-out only. Confirm pilot diameter/depth or a manufacturer-supported no-pilot instruction; none is inferred.                                                                                                                                                                                               |
| NOTE    | first-bed-01: same corner arrangement on every course. Deliberately not interlocked; review the connection.                                                                                                                                                                                                                                     |
| NOTE    | first-bed-01: centre reach is approximately 700 mm from 2 accessible side(s); confirm with the user. 650 mm is a planning prompt, not an accessibility standard.                                                                                                                                                                                |
| NOTE    | Zero end trim assumes square, sound, usable factory/cut ends. Nominal 2400 mm is not a measurement.                                                                                                                                                                                                                                             |
| NOTE    | Known subtotal only; unpriced: consumables, fill, liner, preservative, site_preparation, supports, transport, labour                                                                                                                                                                                                                            |
| NOTE    | Catalogue prices are dated snapshots. The configured store and collection stock are NOT confirmed.                                                                                                                                                                                                                                              |
| NOTE    | Geometry and straight screw-path clearance are checked; timber strength, screw capacity, long-term movement and soil pressure are NOT calculated. Supports/bracing, liner detailing and foundations are site-specific and not drawn by v1.                                                                                                      |

# PURCHASES & COSTS

Catalogue retail purchase prices as displayed; VAT is not recalculated. Explicit extras and labour are added on the same user-supplied basis. Not a tax invoice.

| ITEM                                                                   | NEED / BUY           | LINE TOTAL |
|------------------------------------------------------------------------|----------------------|------------|
| wickes-256948 - 1800 mm sleeper / matching section                     | 6 needed / 6 sleeper | GBP 144.00 |
| wickes-276785 - 2400 mm sleeper / matching section                     | 6 needed / 6 sleeper | GBP 168.00 |
| wickes-287686 - 7 x 150 mm screws; 25/pack                             | 24 needed / 2 pack   | GBP 18.00  |
| wickes-287688 - 7 x 250 mm screws; 25/pack                             | 32 needed / 2 pack   | GBP 24.60  |
| consumables - Drill bits, blades, PPE and other consumables            | 1 needed / 1 job     | UNPRICED   |
| fill - Soil / compost / mulch supply                                   | 1 needed / 1 job     | UNPRICED   |
| liner - Liner / protection and attachment (or explicitly not required) | 1 needed / 1 job     | UNPRICED   |
| preservative - Compatible cut-end preservative                         | 1 needed / 1 job     | UNPRICED   |
| site_preparation - Ground preparation / bedding / disposal             | 1 needed / 1 job     | UNPRICED   |
| supports - Site-specific stakes, bracing, brackets and their fixings   | 1 needed / 1 job     | UNPRICED   |
| transport - Collection / delivery / travel                             | 1 needed / 1 job     | UNPRICED   |
| labour - Labour (nearest penny, half-up)                               | UNCONFIRMED          | UNPRICED   |

**Known subtotal: GBP 354.60**

# Parts and fixings board / visual checklist (page 1 of 2)

DRAFT\_MARK\_OUT\_ONLY | Verify quantity and ID before each step

## TOOLS / HANDLING

[2x] two people for long/heavy members

[CHECK] confirm A/TOP/OUTER labels

[STOP] resolve blockers before drilling

Hammer + driver/bit set + square/level

## FASTENERS

wickes-287686

Pilot UNCONFIRMED

7 x 150 mm  
Need 24 entries

wickes-287688

Pilot UNCONFIRMED

7 x 250 mm  
Need 32 entries

## TIMBER PARTS

| PIECE ID          | BED          | COURSE | SIDE | LENGTH | SECTION | BOARD | A DATUM       |
|-------------------|--------------|--------|------|--------|---------|-------|---------------|
| first-bed-01-C1-E | first-bed-01 | 1      | E    | 1200   | 100x200 | B007  | Lower X/Y end |
| first-bed-01-C1-N | first-bed-01 | 1      | N    | 2400   | 100x200 | B001  | Lower X/Y end |
| first-bed-01-C1-S | first-bed-01 | 1      | S    | 2400   | 100x200 | B002  | Lower X/Y end |
| first-bed-01-C1-W | first-bed-01 | 1      | W    | 1200   | 100x200 | B008  | Lower X/Y end |
| first-bed-01-C2-E | first-bed-01 | 2      | E    | 1200   | 100x200 | B009  | Lower X/Y end |
| first-bed-01-C2-N | first-bed-01 | 2      | N    | 2400   | 100x200 | B003  | Lower X/Y end |
| first-bed-01-C2-S | first-bed-01 | 2      | S    | 2400   | 100x200 | B004  | Lower X/Y end |
| first-bed-01-C2-W | first-bed-01 | 2      | W    | 1200   | 100x200 | B010  | Lower X/Y end |
| first-bed-01-C3-E | first-bed-01 | 3      | E    | 1200   | 100x200 | B011  | Lower X/Y end |
| first-bed-01-C3-N | first-bed-01 | 3      | N    | 2400   | 100x200 | B005  | Lower X/Y end |

Use this board as the pre-flight checklist. Exact cut order and coordinates remain in cuts.csv and fixings.csv.

# Parts and fixings board / visual checklist (page 2 of 2)

DRAFT\_MARK\_OUT\_ONLY | Verify quantity and ID before each step

## TIMBER PARTS (continued)

| PIECE ID          | BED          | COURSE | SIDE | LENGTH | SECTION | BOARD | A DATUM       |
|-------------------|--------------|--------|------|--------|---------|-------|---------------|
| first-bed-01-C3-S | first-bed-01 | 3      | S    | 2400   | 100x200 | B006  | Lower X/Y end |
| first-bed-01-C3-W | first-bed-01 | 3      | W    | 1200   | 100x200 | B012  | Lower X/Y end |

Use this board as the pre-flight checklist. Exact cut order and coordinates remain in cuts.csv and fixings.csv.

## Workshop process / script-driven sequence

DRAFT\_MARK\_OUT\_ONLY | Follow these steps with BUILD.md, cuts.csv and fixings.csv

1. Receive and inspect timber stock; reject twisted/split members.

2. Label each stock board Bxx and mark datum A before any cut.

3. Execute cuts.csv in sequence; kerf\_start..kerf\_end is waste band.

4. Re-label produced parts and preserve A / TOP / OUTER orientation.

5. Drill and drive by piece fixing sheets (exact U, V, W coordinates).

6. Assemble course-by-course using per-course plan sheets.

### CORRECT

Check entry face, direction arrow and quantity before each action.

### INCORRECT

Never drill or drive when pilot\_mode is UNCONFIRMED.

All positions, lengths and hardware IDs are generated from plan geometry; do not freehand from screenshots.

# Stock arrival, board IDs and datum A (page 1 of 2)

Label before cutting; keep original A datum for every stock item

B001 | wickes-276785 | gross 2400 mm

B002 | wickes-276785 | gross 2400 mm

B003 | wickes-276785 | gross 2400 mm

B004 | wickes-276785 | gross 2400 mm

B005 | wickes-276785 | gross 2400 mm

B006 | wickes-276785 | gross 2400 mm

B007 | wickes-256948 | gross 1800 mm

B008 | wickes-256948 | gross 1800 mm

Use these B IDs in parts.csv and cuts.csv. Datum A in cut coordinates always refers to original stock, not the finished part.

# Stock arrival, board IDs and datum A (page 2 of 2)

Label before cutting; keep original A datum for every stock item

**B009 | wickes-256948 | gross 1800 mm**

**B010 | wickes-256948 | gross 1800 mm**

**B011 | wickes-256948 | gross 1800 mm**

**B012 | wickes-256948 | gross 1800 mm**

Use these B IDs in parts.csv and cuts.csv. Datum A in cut coordinates always refers to original stock, not the finished part.

# Fastener card / wickes-287686

Use with piece fixing sheets for exact side and coordinates

Cross-section view (not to scale in thickness)

Used in fixing kinds: corner  
Entry faces in this plan: outer  
Entries scheduled: 24

150 mm nominal

**Pilot: UNCONFIRMED - stop and confirm drill bit diameter/depth before drilling.**

Exact side, point and direction are in piece fixing sheets and fixings.csv (U from A, V, W, and direction XYZ).

# Fastener card / wickes-287688

Use with piece fixing sheets for exact side and coordinates

Cross-section view (not to scale in thickness)

Used in fixing kinds: stack  
Entry faces in this plan: top  
Entries scheduled: 32

250 mm nominal

**Pilot: UNCONFIRMED - stop and confirm drill bit diameter/depth before drilling.**

Exact side, point and direction are in piece fixing sheets and fixings.csv (U from A, V, W, and direction XYZ).

## first-bed-01 / 3 courses / assembled view

DRAFT\_MARK\_OUT\_ONLY | Same timber section throughout | Schematic colour, not a finish sample

**Outside: 2400 x 1400 x 600 mm | Clear opening: 2200 x 1200 mm**

Geometric fill: 1452 litres at 50 mm below the top. No settlement allowance.

## first-bed-01 / course 1 / plan view

DRAFT\_MARK\_OUT\_ONLY | All dimensions mm | Origin O = outside S/W corner | NOT a 1:1 template

Circles = top fixing entries. Arrows = two corner screws at different heights.

Piece sheets give the entry face, datum, coordinates and hardware. A is each piece's lower-X / lower-Y end.

## first-bed-01 / course 2 / plan view

DRAFT\_MARK\_OUT\_ONLY | All dimensions mm | Origin O = outside S/W corner | NOT a 1:1 template

Circles = top fixing entries. Arrows = two corner screws at different heights.

Piece sheets give the entry face, datum, coordinates and hardware. A is each piece's lower-X / lower-Y end.

## first-bed-01 / course 3 / plan view

DRAFT\_MARK\_OUT\_ONLY | All dimensions mm | Origin O = outside S/W corner | NOT a 1:1 template

Circles = top fixing entries. Arrows = two corner screws at different heights.

Piece sheets give the entry face, datum, coordinates and hardware. A is each piece's lower-X / lower-Y end.

# Stock allocation / cutting diagram

Measure every kerf band from ORIGINAL stock datum A. Finished pieces are exact; this drawing is NOT to scale for tracing.

**B001 | wickes-276785 | 2400 mm | 0 saw cuts | offcut 0 mm**

Waste kerf bands from original A (mm): none - use the sound full length

**B002 | wickes-276785 | 2400 mm | 0 saw cuts | offcut 0 mm**

Waste kerf bands from original A (mm): none - use the sound full length

**B003 | wickes-276785 | 2400 mm | 0 saw cuts | offcut 0 mm**

Waste kerf bands from original A (mm): none - use the sound full length

**B004 | wickes-276785 | 2400 mm | 0 saw cuts | offcut 0 mm**

Waste kerf bands from original A (mm): none - use the sound full length

**B005 | wickes-276785 | 2400 mm | 0 saw cuts | offcut 0 mm**

Waste kerf bands from original A (mm): none - use the sound full length

Exact saw band positions and blade-centre coordinates are in cuts.csv. Kerf widths here may be exaggerated for visibility.

# Stock allocation / cutting diagram

Measure every kerf band from ORIGINAL stock datum A. Finished pieces are exact; this drawing is NOT to scale for tracing.

**B006 | wickes-276785 | 2400 mm | 0 saw cuts | offcut 0 mm**

Waste kerf bands from original A (mm): none - use the sound full length

**B007 | wickes-256948 | 1800 mm | 1 saw cuts | offcut 597 mm**

Waste kerf bands from original A (mm): 1200..1203

**B008 | wickes-256948 | 1800 mm | 1 saw cuts | offcut 597 mm**

Waste kerf bands from original A (mm): 1200..1203

**B009 | wickes-256948 | 1800 mm | 1 saw cuts | offcut 597 mm**

Waste kerf bands from original A (mm): 1200..1203

**B010 | wickes-256948 | 1800 mm | 1 saw cuts | offcut 597 mm**

Waste kerf bands from original A (mm): 1200..1203

Exact saw band positions and blade-centre coordinates are in cuts.csv. Kerf widths here may be exaggerated for visibility.

# Stock allocation / cutting diagram

Measure every kerf band from ORIGINAL stock datum A. Finished pieces are exact; this drawing is NOT to scale for tracing.

**B011 | wickes-256948 | 1800 mm | 1 saw cuts | offcut 597 mm**

Waste kerf bands from original A (mm): 1200..1203

**B012 | wickes-256948 | 1800 mm | 1 saw cuts | offcut 597 mm**

Waste kerf bands from original A (mm): 1200..1203

Exact saw band positions and blade-centre coordinates are in cuts.csv. Kerf widths here may be exaggerated for visibility.

# first-bed-01-C1-S / 2400 x 100 x 200 mm

DRAFT\_MARK\_OUT\_ONLY | Datum A = lower global X end | Coordinates in mm, rounded to 0.1 for display

TOP FACE / U along length; V across width from its lower-coordinate edge

OUTER FACE / U from A; W measured UP from bottom / side S

Views intentionally stretch section depth for legibility. Use the coordinates below, not a ruler on this sheet.
